A fish caught in his own net; an examination of nine sermons, from Matt. 16, 18, published last year, by Mr. Joseph Fish of Stonington; wherein he labours to prove, that those called standing churches in New-England are built upon the Rock and upon the same principles with the first Fathers of this country; and that separates and Baptists are joining with the gates of hell against them. In answer to which, many of his mistakes are corrected; the constitution of those churches opened; the testimonies of prophets and apostles, and also of many of those Fathers are produced, which as plainly condemn his plan, as any separate or Baptist can do.
